This chart is a perfect visual for children to see how well they're behaving throughout the day. Simply place the faces on the right-hand side of the chart based on the child's behaviour. The faces and colours make it straight forward for children of even a young age to follow. **Remember to be consistent with following through on your warning's!!**

Please cut out the emoji squares and use “blue tack” to stick the squares on the chart. Remember to unstick all the squares at the end of the day and restart again the next day.
